

## GRUNGE BOARD INSTRUCTIONS FOR MODELS 7003

Thanks for buying these Planet Bike fenders. We design them to make you want to steer your bike towards big puddles and get through them with a smile. Failure to follow installation instructions can result in loss of control, damage, personal injury or death. If you are unsure of any part of the installation process, please consult a qualified bicycle mechanic or local bike shop. If you have any questions regarding installation of the fenders, feel free to check out the FAQs at

[www.planetbike.com](http://www.planetbike.com) or email us at [info@planetbike.com](mailto:info@planetbike.com).

## GOOD GEAR GUARANTEE

We make quality products and they include a limited lifetime warranty to the original owner of our products. These fenders are warranted to be free from defects in materials and workmanship for as long as the original purchaser owns the product. This warranty does not cover damage due to accident, abuse, or normal wear and tear. This warranty is void if the fenders or fender mounting hardware are modified, or are not properly installed on a bicycle for which they were designed. To make a claim under this warranty, return the fenders together with proof of purchase, to the retail dealer from which they were purchased, or contact Planet Bike directly.

Purchaser's sole remedy pursuant to this warranty is for Planet Bike to repair or replace the faulty part(s). Planet Bike provides no other warranty, expressed or implied. This warranty gives you specific legal rights; you may also have other rights which vary from state to state.

## GRUNGE BOARD FENDER INSTALLATION

### 1. Position fender

### 2. Pull tight and hook strap

### 3. Cut off extra straps

## WARNINGS

- Check toe overlap (touching your pedal/foot on the fender or wheel while turning handlebars). If there is interference between your toe and front wheel, we do not recommend using these fenders.
- Check for interference with other bike components, especially brakes, drive train, and suspension forks. If interference is present readjust fenders. If interference remains, do not use the fenders.
- There must be a minimum clearance of 2 inches between the tire and fender. If you do not have this clearance, fender use is not recommended.
- Failure to follow installation instructions can result in loss of control, damage, personal injury or death.
- Check fender installation before each ride to ensure hardware is tight and in good condition and fender is centered over tire with a minimum of 2 inches of clearance.
- These fenders are not intended for competitive use or excessive speeds.
- To keep the fenders functioning safely, replace worn parts as needed. Small parts can be found at [www.planetbike.com](http://www.planetbike.com).
- **If you are unsure of any part of the installation process please consult a certified bicycle mechanic or local bike shop.**
