Pumping Instructions
1) Place head on tire valve. Make sure the head is set for the correct valve (See diagram to the right).
2) Flip lever up to lock head to valve (See #3 below).
3) Inflate tire to desired pressure.
4) Flip lever down to unlock head.

Mounting Instructions
The bracket fits easily underneath your waterbottle cage. Use the velcro strap to prevent the pump from being knocked out of the bracket.

How to use:
1. Pop out head by pulling foot lever out
2. Pull head out to extend hose
3. Twist barrel lever up to lock head on valve
4. Prevents broken valve stems and sore fingers
5. Power up to pressure with less effort
